PROFESSIONAL SUMMARY

I am a motivated **Bachelor of Information Technology (External) undergraduate at the University of Colombo** with a strong foundation in software development, database systems, and web technologies. Experienced in applying theoretical knowledge to practical projects to build efficient, user-focused applications. I am a fast learner with strong problem-solving skills, teamwork abilities, and a commitment to continuous professional growth in the IT industry.

ACADEMIC QUALIFICATIONS

- **Bachelor of Information Technology (Reading - 2022/2026)**
University of Colombo, School of Computing Faculty
- **Currently Studying iCET Certifier Developer Course**
Institute of Computer Engineering Technology, Panadura
- **Higher National Diploma in Information Technology (2024)**
University of Colombo, School of Computing Faculty
- **Diploma in Information Technology (2023)**
University of Colombo, School of Computing Faculty

CERTIFICATIONS

- **Agile Project Management with Jira**
Atlassian and Project Management Institute.
- **Context package in Go Lang**
By Ademusoyo Awosika-Olumo (LinkedIn Learning)
- **Build a computer vision app with Azure Cognitive Services**
Microsoft and offered through Coursera
- **Advanced Certificate in Professional English**
Horizon campus, Kandy
- **Basics of Data Science**
UniAthena in partnership with Cambridge International Qualifications, UK
- **Basics of Python**
UniAthena in partnership with Cambridge International Qualifications, UK
- **Frontend Fundamentals (HTML 5 & CSS 3)**
For successfully completing the following course on Pirple.com

EXPERIENCE

Software Engineer Intern

AgentRuntime Labs Pvt (Ltd) Full-time

Apr 2026 - Present · 3 months

Remote

TECHNICAL SKILLS

- **PROGRAMMING LANGUAGES:** Java | JavaScript | Typescript | Python | Go Lang
- **FRAMEWORKS AND LIBRARIES:** SpringBoot | React | Bootstrap | Angular
- **DATABASE & BACK-END SERVICES:** MySQL | Firebase | Supabase
- **TOOLS & PLATFORMS:** Git | GitHub | REST APIs | Figma | Notion | Atlassian Jira | VS Code | Postman | Click up

PROJECTS

1. DevSnip - Developer Snippet Vault (Spring Boot & Angular) | [Front-end](#) | [Back end](#)

Developed a scalable full-stack Developer Snippet **Vault** application using Angular and Spring Boot with RESTful architecture, supporting tagging, keyword search, and full CRUD operations. Built a VS Code extension to easily save code snippets directly into the system and integrated a local LLM (Ollama) to provide AI-powered explanations for stored snippets, enhancing developer productivity.

2. School Management System – (Ongoing project - Spring Boot & Angular)

Developing a full-stack School Management System to digitize and streamline school administrative processes. Features include student and teacher management, attendance tracking, timetable scheduling, examination and grading management, and role-based access control. Built using **Angular**, **Spring Boot**, **MySQL**, and **REST APIs** following modern software development practices.

3. Multi-Clinic Management System (Collaborative Full-Stack Project - Spring Boot & React) [Front-end](#) | [Back end](#)

Developed, as part of a 3-member development team, a full-stack multi-clinic management platform supporting clinic operations, patient management, scheduling, and billing workflows. Architected secure REST APIs using Spring Boot with layered architecture and RBAC. Constructed a responsive React frontend with dashboards and appointment scheduling interfaces while collaborating closely to deliver a maintainable and scalable system.

4. Disaster Management System - Full-Stack Web Application | [GitHub](#)

Developed, as part of a 3-member hackathon team, a full-stack Disaster Management System enabling real-time emergency reporting and incident monitoring. Engineered a React-based frontend and integrated Firebase authentication and real-time database services. Implemented offline-first GPS reporting with automatic synchronization upon network restoration. Architected a live administrative dashboard for dynamic incident tracking, showcasing expertise in real-time application development and rapid solution delivery.

5. Construction Management System (SaaS) (Spring Boot & Angular)

Serving as a Software Engineer in a 7-member agile team to design and develop a scalable Construction Management SaaS platform. Engineering secure REST APIs with Spring Boot and building responsive Angular components. Implementing and optimizing MySQL database structures to support efficient workflow management. Debugging, testing, and refining system features to ensure performance, reliability, and maintainable code quality
